

JT-I230

Definition of Bearer Service Categories

1.Relations with international standards

JT-I230 is based on ITU-T Recommendation I.230 (Blue Book 1988 version).

2.Summary of departures from ITU-T recommendations

(1) A remark is added that 1920 kbit/s unrestricted bearer services is only applied to the users subscribed to the international ISDN through the 2048 kbit/s primary rate user-network interface.

< Reasoning >

1536 kbit/s unrestricted bearer service is only supported by a primary rate user-network interface in the domestic ISDN.
