

JT-F720

Videotelephony Services, General

< References >

1.Relations with international recommendations

This standard describes the general functions and the attributes of videotelephony services regardless of the communication network environment from which the service is offered, and conforms to the recommendation F.720 which was decided in the CCITT held in August 1992.

2.Departures from the above international recommendation

2.1 Optional items

None

2.2 National matter items

None

2.3 Others

(1) Concerning the 3.1 kHz PCM voice coding system, this standard refers to the CCITT recommendation G.711, because both A-law and μ -law have to be taken into account.

(2) The items described as "Subject of further study in the future" in this standard, will be standardized taking the CCITT study progress into consideration.

2.4 Differences from the ITU-T Recommendation on the framework

The "Above sentence" without a chapter number in the above international recommendation has been advanced Chapter 1 "Introduction" as paragraph 1 in chapter 1 in this standard, and also "Purpose" has been advanced Chapter 1 "Introduction" as paragraph 2 in this chapter

3. Up-dating

Edition	Date	Contents
The 1st	April 27, 1993	Enactment

4. Others
