JT-I364
Support of the Broadband Connectionless Data Bearer Service by the B-ISDN

1. Relationship between JT-I364 and ITU-T recommendation

This TTC standard JT-I364 is based on ITU-T recommendation I.364 which was revised by ITU-T Study Group 13 and was approved under the WTSC Resolution No. 1 procedure in February 1999.

2. Additional items to ITU-T recommendation I.364

2.1 Choice of options in ITU-T I.364

No.

2.2 National matter

No.

2.3 Different items from ITU-T I.364

This TTC standard JT-I364 has Appendix 2, which is different from ITU-T recommendation I.364 in order to understand easily. In order to accomplish it, the appendix 2's figure of I.364 is changed, and figure 2-3, 2-4, 2-5, 2-6 and 2-7 are added to appendix 2 of TTC standard JT-I364.

2.4 Others

Nothing

3. Update record of JT-I371.1

Version	Date	Outline
Release 1	November 28,1995	Established
Release 2	April 20,2000	Revised due to revision of the international recommendation

4. Other
