JT-Q699   Interworking between ISDN access and non-ISDN access over ISDN User Part of signalling system No.7

1. Relations with international standards

This Standard is based on the draft ITU-T Recommendation Q.699 determined in the SG11 meeting in July 2000.

2. Summary of departures from ITU-T Recommendations

2.1   Optional items

None

2.2   National items

None

2.3   Others

(1) This Standard omits the description of the following items for the above ITU-T Recommendation, or selects one of the optional items described therein.

    (a)   The descriptions for international connection are deleted.

    (b)   The supplement services which are not specified in either ISUP (JT-Q73X) or DSS1 (JT-Q95X) are deleted.

(2)   "   " marks indicate additional points for above international Standard.

(3)   The name of the supplement services are based on the Standard (JT-125X) in principle.

2.4   Comparison of chapter composition between the ITU-T Recommendation and this Standard

There is no difference in chapter composition with the above ITU-T Recommendation.

3.   The history of revised versions

Versions	Date	Outline
1	April 28, 1988	Established.
2	November 30, 2000	Revised according to proceeding of ITU-T Q.699.

4.   Others

Note that the title of this Standard JT-Q699(1989) was "Interworking between the digital subscriber signalling system layer 3 protocol and the signalling system No.7 ISDN user part".

The title of this Standard has been changed in this version to be consisted with the modification of the title of the above ITU-T Recommendation with the extension of the scope.
